#### **8Watt Solar Panel Phone Charger Description**

1) Small size but big energy

Lots of customers like its cute size. This GGXingEnergy® **8watt solar panel phone charger** is with 4 folds, extended as 21.5x6.7x0.4 inch, but folded only as 6.7x4.2x1.2 inch, just near with a wallet size or little larger than a phone. Such a small **8watt solar panel phone charger** can produce out max 1.2A current. This means when powering your phone, if sunshine is strong enough, it can provide almost same charging speed as wall charging.

## 2) Great for outdoors

Such a **8watt solar panel phone charger** is portable and foldable. A larger solar panel phone charger is easy to be inserted into the backpack, but this 8watt model is even easy for pocket carrying. The canvas cloth cover is water resistant and durable enough to endure the terrible outside use condition. Both the waterproof cloth and the special PET surface can protect the solar panel from occasional rain, wet fog or marine use. When you are camping, hiking, climbing, picnic, fishing, riding, kayaking or for other outdoor activities, you can just hide this **8watt solar panel phone charger** in your pocket to take it anywhere, or tying it on your backpack, or hanging it on a fence..., to get your phone, tablet, power bank, switch, PSP, music player, earphone, GPS, etc. been charged via free sunlight when power going down.

### **8Watt Solar Panel Phone Charger FAQ**

1) For this small item, we can see several similar designs online described as 10w, 20w, 30w or even higher, but yours is only 8w?

Yes, this is true. We will never write fake power to win orders. If you see a similar item is with very near size as ours, its max real power is only 7w. 95% of other sellers use polycrystalline solar cells. And ours is max 8w, only using A-grade monocrystalline solar cells.

2) So what is your advantage compared with other similar items?

We are the original manufacturer for this **8watt solar panel phone charger**. Other similar items appeared as copying after this item becoming super hot. Thus our **8watt solar panel phone charger** is with totally different solar panel and always with the best quality compared with others. Welcome the sample test and comparison for the **8watt solar panel phone charger**. The quality of other similar ones is like winning orders with low price. Some are even very simple producing just with the goal the item can be used. But we will focus on the long time use life of the product and also the ensured after sale service.

3) Can this **8watt solar panel phone charger** charge well iphone?

Yes, it can charge well iphone. But we suggest to do this under super bright sunlight. Since iphone itself is with charging protecting system, if current is too low, it will refuse charging and show "device not supported". When this appearing, please move the charging cable and do the new connection when sunshine becoming stronger.

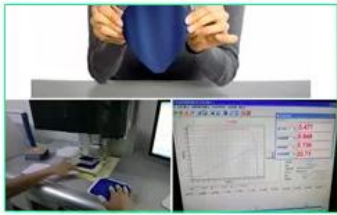

4) Can this **8watt solar panel phone charger** charge tablet?

Yes, it can charge tablet. Also we suggest to do this under super bright sunlight. Because normally the tablet will need high current for charging. This **8watt solar panel phone charger** can be up to 1A if sunshine is strong enough, and this is suitable for tablet. But if you want more faster charging, we recommend the 30watt solar panel phone charger.

5) What are in the package?

1 x **8watt solar panel phone charger**, 1 x carabiner, 1 x 30cm micro 5pin USB charging cable, and 1 x manual are in the package. If there is no right cable for your device, please kindly use your own original charging cable. Specially for the drop shipping orders, there will be never with our company or promotion info. We can paste a label with your own logo on the package if you needing.
